1. Use-Case Name

UC14: View Daily Study Widget

1.1 Brief Description

This use case presents a dedicated schedule widget on the main Self-Study Dashboard. Based on the Learner's committed study hours (UC13), the widget displays assigned daily lessons, calculated session durations, and real-time completion checklists for the current day.

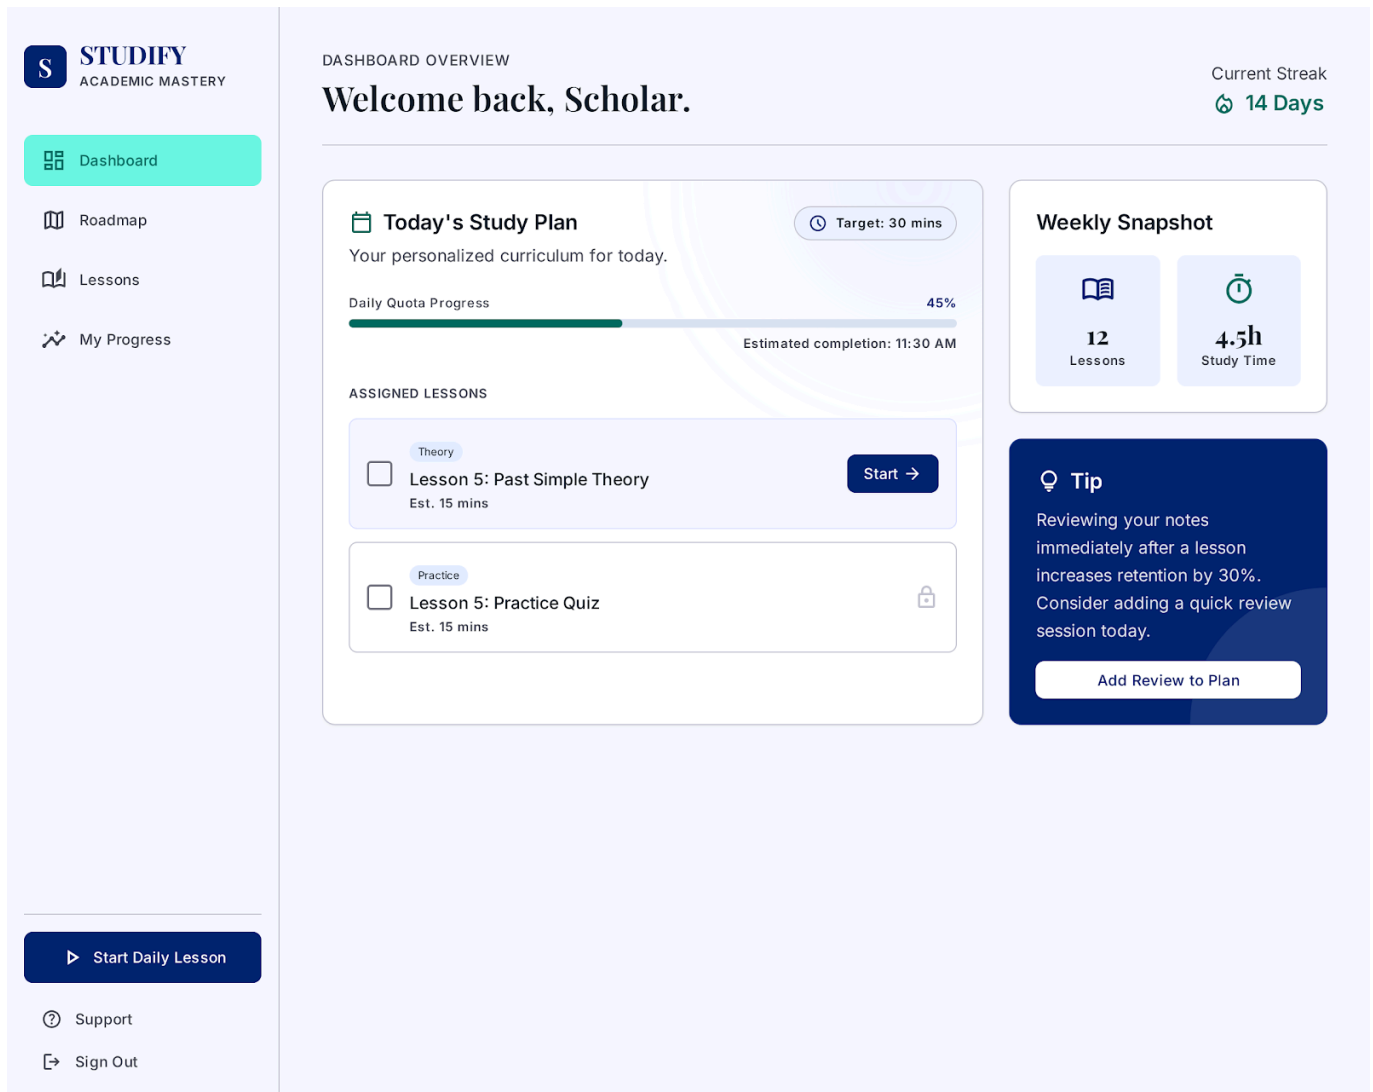

Figure 14.1: "Today's Study Plan" widget showing daily quota progress, assigned lessons (Theory/Practice), and a contextual study tip.

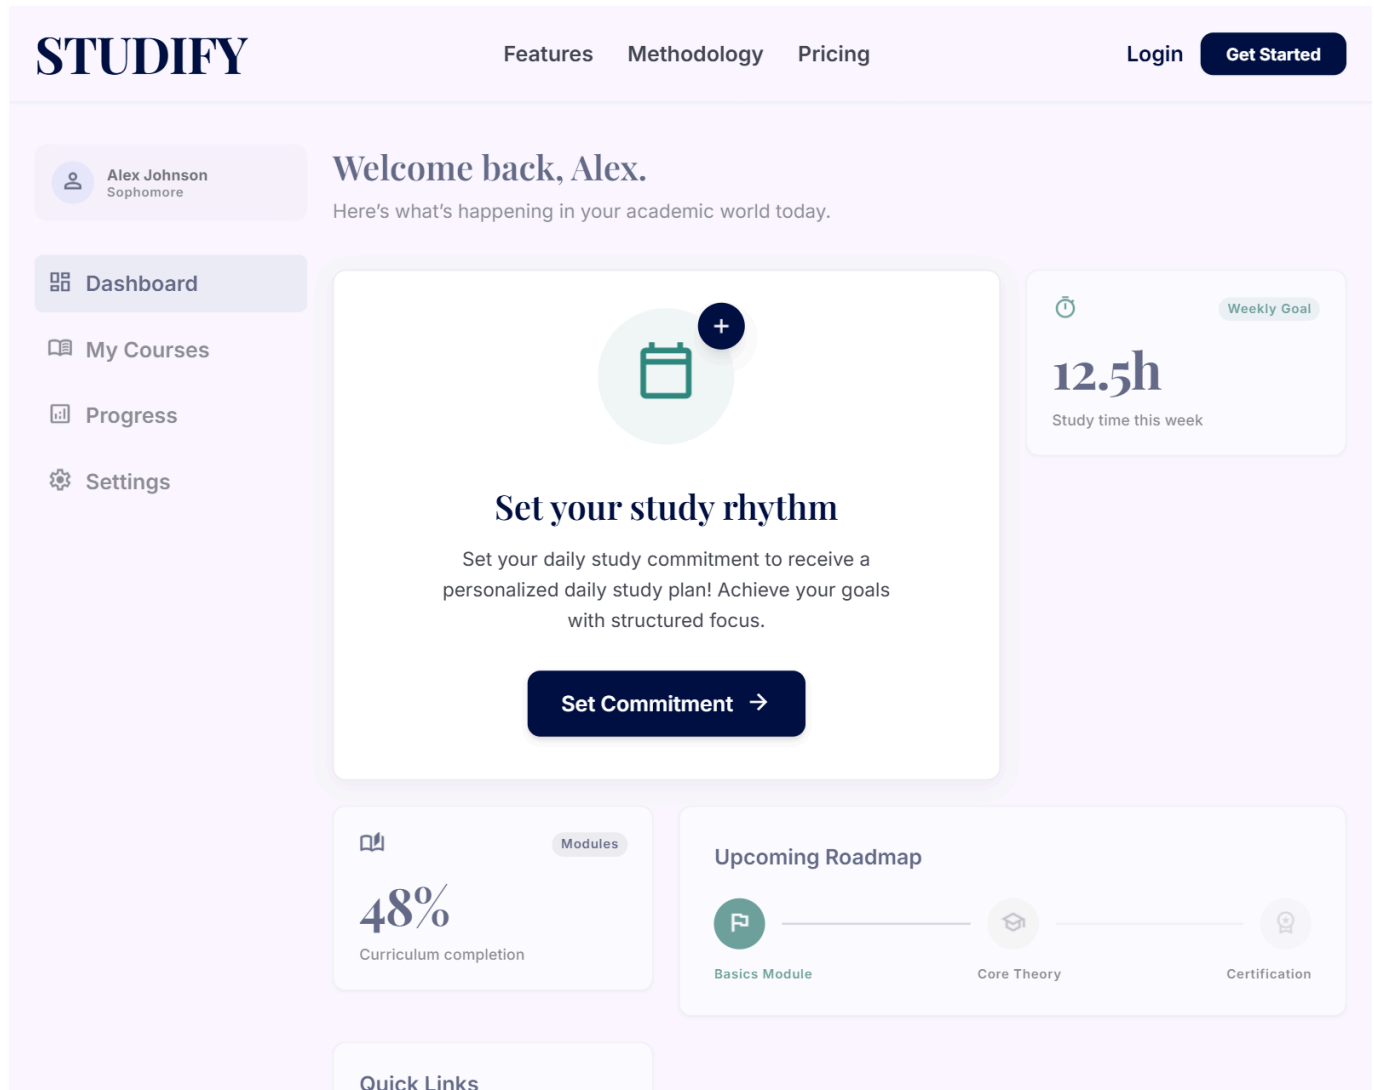

2. Flow of Events

2.1 Basic Flow

1. The Learner lands on the Self-Study Dashboard page.
2. The widget invokes **UC15: Calculate Daily Tasks Schedule** (<> *relationship*) to compute today's target lessons based on user commitment.
3. UC15 returns the list of daily assigned lessons and estimated total time.
4. The system renders the Daily Study Widget displaying:
 - Target time for today (e.g., "30 mins target").
 - Assigned lesson cards (e.g., "Lesson 3: Grammar Focus").
 - Completion checkboxes and start buttons for each task.
5. The Learner views their daily schedule or clicks a lesson task to jump directly into **UC3: Study Lesson**.
6. The use case ends.

2.2 Alternative Flows

2.2.1 No Commitment Set

If the Learner has not yet configured their commitment hours via UC13:

1. The widget displays a default banner: "Set your daily study commitment to receive a personalized daily study plan!"
2. Clicking the banner redirects the Learner to **UC13: Set Study Commitment Hours**.

3. Special Requirements

3.1 Widget Responsiveness

The widget must render cleanly at the top of the mobile and desktop dashboard layout, allowing one-tap access to launch today's lessons.

4. Preconditions

4.1 Dashboard Access

The Learner must be authenticated and viewing the main dashboard interface.

5. Postconditions

5.1 Tasks Displayed

The Learner's daily agenda is visually presented without modifying underlying data.

6. Extension Points

6.1 None

No extension points for this use case.
